ADSoftware successfully implements AirPack in Asia; Thai Express Air & City Airways

ADSoftware, one of the leading international aviation software firms, is pleased to announce the successful implementation of their AirPack maintenance and logistics system for two more airlines in Thailand; City Airways and Thai Express Air.

ADSoftware's presence in the Asian aviation industry began in 2006 when the French MRO***** software specialist partnered with Aviation Engineering & Planning Services (AEPS), for the exclusive distributorship of AirPack in the Middle East and Asia. Together they have signed 11 operators on the Asian continent in countries like Thailand, Laos and Myanmar.

AEPS has provided on-site B2B training and support for City Airways and Thai Express Air, to facilitate the software installation phase. The cargo airline, Thai Express Air currently operates a single B737-300(F), while low cost carrier (LCC), City Airways is operating a B737-400 and 1 B737-800. The Don Mueang based LCC offers domestic flights as well as regional flights to popular destinations like Hong Kong and China.

Commenting on the successful launch of the AirPack solution for the two airlines, the CEO of ADSoftware Fred Ulrich said, "Our principle is to get as close to the customer's needs as possible, while meeting the highest possible standard of regulatory compliance and cost effectiveness".

AEPS Administrative & IT Director also commented, "We have been implementing the AirPack suite for several years now to meet the airworthiness needs of our customers. The fact that we can easily customize the software to generate the information at the customer's request makes AirPack our software of choice".

*MRO: Maintenance, Repair & Overhaul

About AEPS

Aviation Engineering & Planning Services (AEPS) was established in 2004 in South-East Asia and provides a wide range of services for small and medium airlines. With branches in Thailand, Myanmar, Brunei and Laos, AEPS is dedicated to deliver consistent and quality services to its clients.
The company's main objective is to offer tailor-made services on fleet monitoring, according to the regulations issued by the EASA, the FAA and also the local DCAs such as engineering, planning and airworthiness survey. By supporting operators in; aircraft phase-in or phase-out, bridging program, technical records management, daily fleet management, AD survey, trend engine monitoring, fleet reliability, training and on-site assistance, AEPS distinguishes itself from competitors and bring valuable know how to its clients – especially for startup operators or companies starting new aircraft type .
Concurrently with its main objective, the company also provides Flight Safety Management System services, according to ICAO standards.

About ADSoftware

ADSoftware is a seventeen year old IT company based in France, with offices in Thailand, Brazil and South Africa. Specialising in solutions dedicated to the aviation industry, ADSoftware counts 54 clients worldwide. The strength of ADSoftware is the accessibility of its products which are Microsoft Windows® ready, web-enabled, and multilingual. The company provides 24/7 online technical support.

The company has developed AirPack a modular ERP (Enterprise Resource Planning) suite that includes six modules organised around a single database. Each module has its own specificities. AirTime is a dedicated tool for Fleet management & CAMO activities (Continuing Airworthiness Management Organisations), AirStock assist with Inventory control & Logistic, AirDoc is the documentation management module, AirUser handles the security management, AirStat allows reliability and statistic reports and AirWork time-tracking software.

ADSoftware has also developed DailyPack a package of two integrated modules, DailyReport and DailyQual, used by military, police and rescue flying operations. It is a solution dedicated to recording and managing all kinds of missions, and to follow-up on skills and qualifications of pilots and aircraft mechanics.

In January 2015, ADSoftware was nominated as a Finalist in the Air Transport News 2015 Awards as IT Company of the year.

In February 2015, ADSoftware was selected for the second time as a finalist in the European IT & Software Excellence Awards 2015. The company was shortlisted in the SME Solution of the Year category.
